When in doubt
CALL
us.
We are here
Monday –
Friday 8-5
gone for
lunch 12-1.

WHEAT REVENUE PROTECTION

The price of wheat has dropped by about 23% which raises your guarantee. We must have your wheat production NOW to calculate a revenue loss. There is a deadline to get the loss turned in.

Important Dates

Fall Sales Closing-September 30

- To sign up for forage and wheat or to change the current level (CAT to buy up.)

Rangeland-November 15

- If you would like a quote, please call.

2016 Premiums Due:

- Forage and Rangeland due 7/1
- All other crops due 8/15

***If your bill is due, you need to pay it and not wait for the loss to cover it. If it is not paid on time, you may have to pay interest or be cancelled if not paid by termination date.**

Production Due:

- Sugar beets, corn and alfalfa seed due as soon as harvested
- All other crops due now to ensure a timely reported loss

Acres Due:

- Forage-10/15
- Wheat & Rangeland-11/15
- Alfalfa Seed-12/15

PRODUCTION AUDIT

If you don't have sold records or a loss and you feed your production please call and we will send out an adjuster to verify your production. Random audits can cost you money on assigned yields. Please report all forage production by bale count per field.

Uninsurable Crops and Land

If you plan to plant an uninsurable crop or will be planting a crop on uninsurable ground, please notify our office ASAP. A written agreement may be an option to insure some of these instances. This includes new breaking out of sod or any CRP ground broken out two years after the contract expired.

NOTICE OF LOSS

It is very important to get production to us as soon as possible so we can determine a revenue or production loss per unit.

If you intend to do something with your crop other than the way you insured it, for example hay your barley or silage or earlage your grain corn, the crop needs to be adjusted before you do anything. Call us and we will get an adjuster out for you.
