

2017 Spring Newsletter

MALT BARLEY HAS CHANGED again

Call if you would like a malt barley only update newsletter. You should have received a letter last month.

Prevent Planting

To qualify for a PP payment, the cause MUST be weather related. PP pays 45% on sugar beets and 55% of your guarantee on all other crops.

Sugar Beets

Sugar beet replants will be paid up to \$80 per acre.

Notice of Loss

A notice needs to be turned in within 72 hours of the loss, but no later than 15 days after the end of the insurance period or the crop being harvested. Even if you only suspect a loss **call it in**.

Written Agreement on uninsurable crops

The RMA will only look at insuring an uninsurable crop or type if there is 3 yrs of production history with a like crop. This must be done prior to sales closing date.

Replanting of crops

Any fields that need to be replanted must be looked at by an adjuster before you replant.

Non Irrigated Corn may be eligible for NAP coverage by the FSA. Please call your local FSA to get more info Before March 15th.

Any fed production should be verified by the insurance company adjustor. Please let us know if you need an adjustor to stop by.

If you are thinking of planting a crop that is not on your policy, please let us know by March 15th so the crop can be added to your policy.

DATES TO REMEMBER

Spring Crop Sales Closing: March 15
 2016 planted forage plant count: May 10
 Spring Crop/s Acreage Report July 15
 2017 Premiums Rangeland & Forage July 1
 All other crops August 15

Spring-Crop Acres

Please make sure that all your insured fields are showing on your FSA maps. We have found a few cases where the FSA offices were missing fields.

If you are going to hay your grain crop rather than combine it or graze your hay crop, you need to call us so an appraisal can be done by an adjuster prior to you doing so.

Whole Farm Revenue Protection (WFRP)

Call for more details.
